

Software Release - RADAR 3.39 Software Now Available

The latest RADAR software is now available. 3.39 software is a minor bug-fix upgrade with 20+ updates – it's a free download for users running 3.3X software. To download 3.39 software click [here](#), or to view the 3.39 Release Notes click [here](#).

A reminder to 3.38 users – you can now download interim software releases like 3.39 directly from www.izcorp.com without the need to manually FTP files or create a software disk. If your RADAR has WAN access, go to Main Menu/System Menu/ Update Software. Choose Web:izcorp.com and the 3.39 Software option will appear. This feature can only be used for downloading free interim upgrades.

We highly recommend that you run current RADAR software. For information and pricing on upgrading from 3.1X or 3.2X software, please call us toll free at 1-800-776-1356, email us at sales@izcorp.com, or contact an authorized iZ dealer.

iZ News – iZ Welcomes Kevin Jones to the Sales Team

We're pleased to bring Kevin Jones onboard as the newest member of the iZ Sales Team. Kevin has extensive experience in pro audio equipment sales and also drums in a rock band (their latest album was recorded on RADAR). As the iZ Inside Sales rep, Kevin will be dealing with all of our direct clients. Welcome to the family, Kevin!

Technical Bulletin – RADAR and New Daylight Savings Standard

To help conserve energy, Daylight Savings dates in the United States and most of Canada began 3 weeks early this spring and will last one week longer in the fall. As RADAR had been set to automatically change time on the first Sunday of April and the last Sunday of October, this setting may no longer conform to the new Daylight Savings standards in your region. To access the Technical Bulletin detailing how to change RADAR's date and time, please click [here](#).

Tech Tip – How Much Record-Time is Still on my Drive?

If you've ever been in a recording session and wondered if your drive had enough juice left to capture the whole set, then this Tech Tip is for you!

To find out how much record-time is left on your mounted drive, just press and hold the right and left arrow keys simultaneously. The LCD screen on your Session Controller will display the record-time remaining in hour/minute/second format – the same information will be displayed on the monitor's GUI for KC24 users. This function can be used while the transport is in STOP, PLAY, or RECORD.

To share or request a Tech Tip, please contact support@izcorp.com.

iZ Community – Call for RADAR Photos and Testimonials

We're a month away from launching the new iZ website complete with an improved Support section, better navigation, and many other exciting features.

We'd like to include you in our website – please send us pictures of your RADAR setup and/or testimonials about your experiences with iZ and RADAR. Photos and testimonials can be sent to Cecilia at marketing@izcorp.com
