Visit iZ Technology at AES San Francisco 2006

Barry, N.J., and Jay will be chatting about RADAR and the cool new 3.38 software features at AES booth #1312. Stop by to check it out or just to say hello!

RADAR Software Version 3.38 Now Available

iZ Technology has announced the release of the anticipated 3.38 RADAR software. With 18 new features and over 140 improvements, this software is a key upgrade for RADAR users working in Music Studios, Live Performance, or Post Production. Features include:

- Simplified file transfers via on-board FTP Client
- One-step backup to DVD-R/CD-R directly from recording drives
- 23.967 Frame Rate support for HD Video
- 48 Hz PAL Sync Mode maintains 48 kHz sample rate for 24 frame HD film projects
- "Current Project" setting for retaining track names across multiple projects
- Backups which now include Project Notes
- Audio Level Measurement for accurate dBSF audio level on the selected track
- Enhanced System Info Menu
- Improved Save Debug options which let you save debug to any location including direct email to iZ Support.
- New Software Update Feature: RADAR adds option to download future software updates directly from izcorp.com

3.38 is now available for free download to current 3.30+ owners [here](#). Owners of previous software versions should contact iZ Sales or their dealer for details on how to upgrade.

October Tech Tip – Locate to Start/End of an Audio Region

Have you ever tried to jump to the beginning or end of an audio region with the jog wheel? Time consuming and far from precise, right? Here's an easy shortcut:

- 1) Press RECALL LOC
- 2) Press ? ? or ? ? depending if you want to jump to the start or end of the region

To jump to the beginning or end of an audio region on a specific track, just press SOLO TRACK before following the above steps.

RADAR 24 Upgrade Alert – Limited Availability of PIII Processors

iZ Technology has secured a limited quantity of 1GHz Pentium III processors for RADAR 24. A minimum 800Mhz processor is required for Version 3.30 software and up, but further upgrade to these Pentium III processors is highly recommended to ensure compatibility with future software releases and maximize network performance. Price is \$185.00USD.
