**FOR IMMEDIATE RELEASE**

## **The Art Institute of Vancouver Enters into 5th Year of RADAR® Multi-Track Recording**

**Vancouver, BC (January 29, 2007)** iZ Technology and The Art Institute of Vancouver are pleased to be entering the 5<sup>th</sup> year of RADAR® multi-track recording in the Recording Arts Department's four music recording studios.

Each of the four studios features a RADAR® 24 Classic multi-track recording system complete with Session Controller Professional Remote and Meterbridge 24. Each RADAR® 24 Classic system records up to 24 channels of audio at 48 kHz with its standard Adrenaline Recording engine. The RADAR® systems are the studios' main recorders.

"RADAR is central to what we do in our Recording Arts programs," says Andrew Czink, Academic Director of Recording Arts. "The interface is clear and uncomplicated which lets beginning students concentrate on studio signal flow rather than worry about recorder operation. For our advanced production students RADAR allows for a smooth, efficient workflow in the studio and, most importantly, it sounds great! The converters are beautiful and transparent, allowing the full range of sound to be accurately and musically captured. Our audio programs have a strong emphasis on 'real world' training scenarios and RADAR supports our mandate perfectly."

iZ Technology's RADAR® systems are the premier choice for digital multi-track recording and playback in some of the finest recording studios, scoring stages, theatres, and post production houses around the world.

"With RADARs as the central recorders in their studios, can you imagine the number of times those tracks have been armed?" says Barry Henderson, President and founder of iZ Technology Corporation. "It's fantastic that The Art Institute of Vancouver Recording Arts students are doing their studio work with RADAR. With its emphasis on effective workflow, mission-critical reliability, and full-spectrum sound, RADAR takes care of the basics leaving students free to listen and create. It's what recording music should be about."

Audio Education institutions across North America feature RADAR in their curriculums and recording studios.

The Art Institute of Vancouver is one of The Art Institutes ([www.artinstitutes.edu](http://www.artinstitutes.edu)), with 32 education institutions located throughout North America, providing an important source of design, media arts, fashion and culinary arts professionals.

RADAR® 24 and RADAR® V systems are available to Audio Education Institutions at a 15% discount. To find out if your institution is eligible or for more information about RADAR®, please contact an authorized iZ dealer or contact iZ directly via website ([www.izcorp.com](http://www.izcorp.com)) or toll-free phone 1-800-776-1356.
