**FOR IMMEDIATE RELEASE**

## **iZ Technology Authorized Service Centers (iTASC) Now Open in the U.S.A.**

**Vancouver, BC (January 15, 2008)** iZ Technology Authorized Service Centers (iTASC) for RADAR® systems and other iZ products are now open in the U.S.A. With three iTASC locations serving the West Coast, Central, and East Coast territories, RADAR® users will enjoy more convenient access to repairs and upgrades.

“We’re extremely pleased to offer RADAR users better access to authorized iZ Services” says Barry Henderson, President and CEO of iZ Technology. “By setting up iTASC locations that cover the major territories in the U.S.A., we’ve greatly simplified the upgrade and repair process. iZ customers’ studio down-time and freight costs will be significantly reduced since they won’t have to deal with cross-border shipping.”

The iTASC U.S.A. team is Dana Hathaway of Access Audio in L.A., David Habegger of Watermark Communications Inc. in Nashville, and Mark Cochi of RDR Audio in New York. All three technicians – long-time RADAR users – attended hands-on training at iZ Headquarters in Vancouver where they worked directly with iZ Service Manager Raymond Lam and iZ Support Manager N.J. McDonnell.

“With Dana’s 10-year technical background with RADAR and Mark and David’s expert user knowledge of various RADAR platforms, our customers can be 100% confident that they’re getting the same legendary iZ service that they would get at iZ Headquarters in Canada,” says N.J. McDonnell, iZ Support Manager.

All iTASC locations offer authorized RADAR® upgrades, RADAR® repairs, RADAR® system tests, and RADAR® data transfer. iTASC Canada, located at iZ Headquarters in Vancouver, BC, is currently the only iTASC location that offers Hard Disk Data Recovery.

For more information on iTASC services and locations, please visit the iZ website at <http://www.izcorp.com/support-service.php>.
