

RADAR STUDIO

Long considered the world's finest digital audio recorder, RADAR now runs Pro Tools, natively. RADAR studio renders both the audio PC and audio interface obsolete. Track and mix with a single, integrated, best-in-class audio appliance.

RADAR. Your favorite DAW. One box.

PRAISE FOR RADAR

"An impressive clarity of vision and a deep understanding of the needs of audio professionals."

Sound on Sound magazine

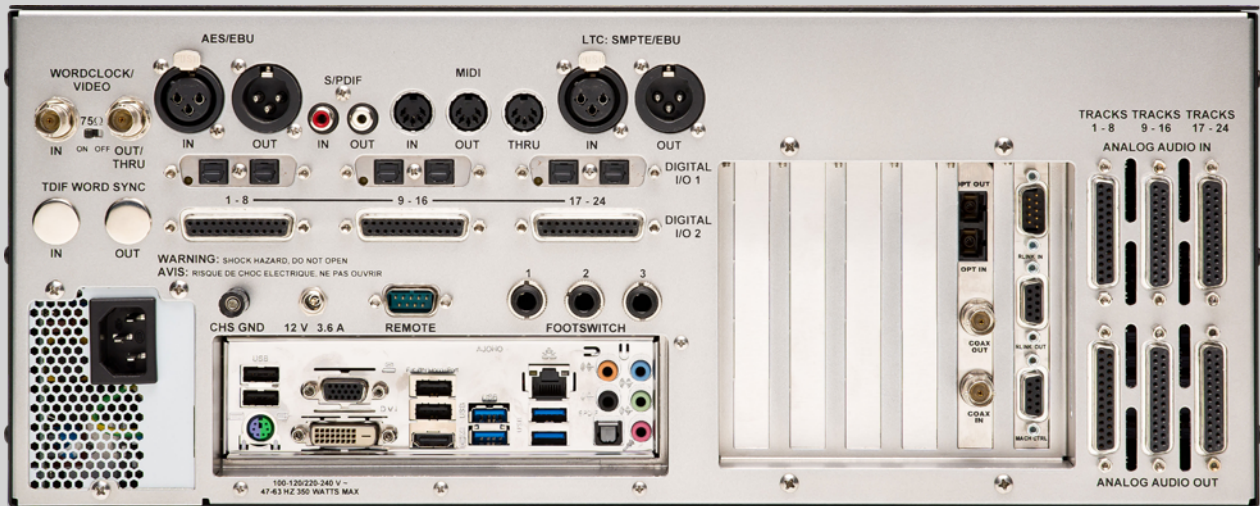

"A stellar update that is smaller, quieter, faster, and cheaper than the previous incarnations."

Electronic Musician

"RADAR 6 Multitrack Recorder: Legendary, reliable, and world-class - RADAR is a format unto itself."

Pro Audio Review

When you record on RADAR, you're 100% focused on the sound.

Key Features

Breathtaking sound

Built with world-class converters and Adrenaline DR technology, RADAR studio transcends the digital barriers of sonic quality.

World-Renowned Support

Our dedication to you doesn't end when you walk out the door. eMail, phone, Skype, we're always at your fingertips, ready and eager to answer

Simple to use

As any studio owner knows, the difference between good and great often almost always comes down to the performance. Be creative instead of steering a mouse. Just arm your tracks, hit RECORD, and focus on the music.

Runs Pro Tools

RADAR has always been the best digital audio recorder, and now it's the best DAW host. Running Pro Tools natively, you can track, mix, and automate, using all the plugins and features your workflow requires.

Reliability

These systems are rock-solid. You won't have to make excuses for your RADAR. Think about it - without techno-tweaking and re-booting your DAW, how much more great music do you think you could capture?

Life-span

As the world becomes increasingly digital and disposable, you'll be at ease knowing your RADAR will last. Meticulously designed and made of the highest quality components, RADAR, unlike audio PC's and audio interfaces, is a true investment.
